

# ISURU DANANJAYA

## FULL-STACK WEB DEVELOPER

### ABOUT ME

I am a Full-Stack Developer who has been working on websites for more than three years. Currently, I am an undergraduate student at SLIIT University pursuing a degree in information technology (Final Year). I am an active learner who enjoys experimenting with new tools and frameworks to expand my skill set. My abilities to solve problems, think creatively and communicate allow me to simplify difficult ideas and make valuable contributions to group projects. Whether delving into front-end or back-end work, I welcome all opportunities to take my abilities to new heights by accepting challenges that push me beyond what I already know. As a self-starter with a propensity for rapid learning, I readily adapt to emerging technologies and focus on delivering innovative solutions that create real impact. **I suggest that you visit my portfolio website to learn more about me.**
